SAMIKSHA WAGH

Pune, India | +91 9322212187 | samikshawagh10@gmail.com | linkedin.com/in/samiksha-wagh10 | github.com/samikshawagh10

PROFESSIONAL SUMMARY

CSE student at DES Pune University specializing in Machine Learning, Computer Vision, and Generative AI. Built 3+ end-to-end AI-powered projects including a food recognition app (OpenCV + PyTorch) and a Claude-powered habit accountability tool. Interned as a Data Scientist at Innovateloop Solutions — built churn prediction model (78% precision) on 50K+ records. Certified in Databricks ML and Anthropic Claude. Seeking Data Science / ML / AI internship roles.

TECHNICAL SKILLS

Languages: Python, Java, SQL, C++, HTML/CSS

ML & Computer Vision: Scikit-learn, TensorFlow, PyTorch, OpenCV, Supervised/Unsupervised Learning

Generative AI & LLMs: Claude API, OpenAI API, LangChain, RAG, Prompt Engineering

Data Science: Pandas, NumPy, EDA, Feature Engineering, Statistical Analysis

Tools & Platforms: Flask, Git/GitHub, Jupyter, Databricks, Streamlit, VS Code, Google Colab

PROFESSIONAL EXPERIENCE

Data Scientist Trainee — Innovateloop Solutions Feb 2026 – Mar 2026 | Remote

Internship · Pune, Maharashtra

- Performed EDA on 50,000+ customer records using Pandas and NumPy; identified 8 key features that improved model accuracy by 12%.
- Built a Random Forest churn prediction model achieving 78% precision; automated data cleaning pipeline reducing preprocessing time by 35%.
- Delivered data visualizations via Matplotlib and Seaborn to communicate insights to non-technical stakeholders.

PROJECTS

NutriScan AI Python · OpenCV · TensorFlow / PyTorch

- Built a computer vision app that scans food images and returns real-time nutritional breakdowns using multi-class image classification.
- Designed end-to-end pipeline: image capture → OpenCV preprocessing (normalization, resizing, augmentation) → model inference → nutrition output.

Discipline AI Python · Claude API

- Developed an AI-powered habit tracker with a Claude-driven accountability coach that analyzes consistency patterns and delivers personalized motivational feedback.
- Built conversational interface that responds dynamically to habit streaks and drop-offs, providing context-aware nudges rather than generic reminders.

URL Shortener with Analytics Python · Flask

- Built a full-stack URL shortening service with custom short code generation, collision handling, and a click analytics dashboard.
- Implemented REST API backend in Flask tracking total clicks, referrer sources, and timestamps per link with a responsive frontend interface.

EDUCATION

BTech, Computer Science Engineering — DES Pune University Sep 2025 – May 2028

AWS Cloud Club Member · IEEE Student Section · Building hands-on ML/AI GitHub portfolio

Diploma in Computer Science — Zeal College of Engineering & Research, Pune 2019 – 2022

CERTIFICATIONS (12 total)

Microsoft Certified: Machine Learning (Databricks) — Mar 2026 · Claude 101, Anthropic — Mar 2026 · 10 additional certifications on LinkedIn
